

Programming in Python- Additional Practice Questions

Module 1 : Basic Coding

```
n=int(input())  
secondLast=0  
last=1  
if n>0:  
    print(secondLast)  
if n>1:  
    print(last)  
for i in range(3,n+1):  
    nextNumber=last+secondLast  
    print(nextNumber)  
    secondLast=last  
    last=nextNumber
```
